

Examples of items previously awarded with the Safety Grant Program (not an all-inclusive list):

- Air Purifier to reduce exposure to COVID-19
- Arborist helmet with built in radio system allowing free communication between the work crew
- Arc Flash suits to reduce risk of serious injury from electrocution
- Articulating Boom Lift to reduce fall hazard
- Auto Brake system to reduce MVAs
- Automated Fire Hose Roller with drainage system to reduce strains and repetitive motion injuries
- Confined Space Entry Equipment to ensure a safe breathing environment and emergency retrieval system
- Conveyor System with Pallet Carousel to reduce back strain sprain
- Crimping tool to reduce manual material handling associated with strain and repetitive motion
- Custom vibrating table to remove employees from manual handling concrete vibrators
- Dolly and Pickup Truck Receiver Hitch Crane for risk reduction of material handling
- Drone with remote controller and camera eliminates need for employees to be exposed to fall injuries
- Dust collector system to reduce dust exposure
- Electric Scissor Lift eliminates use of scaffolds and ladders
- Electric Stairclimber Hand Truck reduces back strain and slip trip fall hazards
- Electric Tarp Conversion Kit to reduce fall risk to employees climbing on trailer and shoulder and hand strain from a
- Floor cleaners which allow for discontinuation of corrosive chemical strippers and allows employees to use only wa
- Horizontal Lifeline Systems to reduce fall risk while working at heights
- Hydraulic squeeze chute used to hold the animal in place so that care and inspection can occur
- Industrial Tire Changer to reduce back strain sprain
- Lift Table to reduce back injury when lifting heavy items
- Lighter extrication equipment for easier handling
- Materials for bulletproof reception area for protection of employees from federal inmate exposure
- Mobile fall protection system to reduce fall risk to employees while working at elevation
- Motorized pallet jack to reduce strains of material handling
- Patient lifting device to assist caregivers with getting non ambulatory clients weighed
- Patient pool lifts for transferring clients in and out of pool and lake
- Permanent stairs affixed to a grain bin to reduce the need for ladders
- Power Load System to reduce back injury risk when handling patients
- Powered scaffolding system that removes employees from working off ladders
- Rail mounted lifts for patient handling risk reduction
- Railcar Mobile access platform with safety cage to reduce fall hazard
- Refuse Cart Lifter to reduce the risk of manually dumping trash bins into the truck
- Remote Access Gate to reduce employee's physical exposure to cattle
- Remote Controlled Water Canon will reduce potential for falls
- SawStop Industrial Cabinet Saw with push blocks alleviates finger hand amputation
- Skid Steer to reduce manual lifting of materials
- Slip Resistant flooring materials to create a textured and durable walkway for employees
- Stair chair used by first responders to reduce potential for back injury
- Swift water rescue equipment and training
- Tilt Tables to reduce risk to employees lifting and lowering materials
- Tire Changing Machine to reduce tire handling hazards
- Trench box to reduce the risk of caught between injuries

- Truck mounted grapple saw reduces tree trimmers exposure to falls from elevation
- UV disinfecting lamp used to disinfect rooms and reduce exposure to COVID-19
- Vacuum Lift and Crane System to reduce material handling repetitive motion risks to employees
- Walk behind floor scrubber to reduce silica exposure in a manufacturing environment
- Walk behind skid steer to reduce back strain sprain
- Water fed poles to eliminate use of ladders and man lifts for window washers
- Welding helmets to reduce exposure to welding fumes and high temperatures
- Wheelchair accessible van for patient handling risk reduction
- Wheelchair scales to prevent lifting and moving clients from in and out of wheelchairs
